[github.com/Nitesh-5652](#) | [linkedin.com/in/niteshs](#)

Skills

Languages: C/C++, Java, Python, JavaScript, SQL

Data Structures & Algorithms:

Arrays, Strings, Linked Lists, Stacks, Queues, Searching, Sorting, Basic Problem Solving

Technologies & Tools: Java, FastAPI, MySQL, Git, GitHub, VS Code, React.js

Work Experience

Mirai School of Technology
Software Engineering Intern

July 2025 – August 2025

- Worked on real-world software and AI workflows including data handling, preprocessing, and backend logic.
- Developed and delivered a project demonstrating strong understanding of practical software development processes.
- Improved debugging and problem-solving skills while working with backend technologies.
- **Technologies:** Python, MySQL, Git, GitHub

IBM SkillsBuild (CSRBOX)

July 2025 – August 2025

AI Project Trainee – Agentic AI

- Completed a structured project-based learning program focused on **Agentic AI systems**.
- Gained hands-on exposure to AI agent architecture, workflow planning, and intelligent automation concepts.
- Strengthened technical fundamentals in Java, Python, and modern AI-driven software systems.
- **Technologies:** Java, Python,

Education

Vivekananda Global University, Jaipur

Aug 2022 – Jun 2026

Bachelor of Technology (B.Tech) – Computer Science and Engineering

CGPA: 6.32 / 10

Relevant Coursework: Object Oriented Programming, Databases, Discrete Maths, Data Structures and Algorithms, Operating Systems, Computer Networks, Machine Learning, Data Mining, Image Processing

Project Work

- **SigmaGPT – AI-Powered Assistant (2025):** Developed an AI-powered assistant capable of generating intelligent responses and automating user tasks. Implemented REST APIs using FastAPI and integrated OpenAI GPT models for natural language understanding. Added session handling and multi-turn conversation memory to improve response accuracy and user interaction Java, FastAPI, OpenAI API.
- **AI-Powered Code Review & Intelligent Software Assistant (2025):** Developed an AI-driven system to analyze source code, detect bugs, and suggest optimized improvements. Implemented LLM-based reasoning to explain code logic and recommend best coding practices. Built a user interface to upload code files and view structured improvement reports, reducing manual code review effort Java, Python, React.js.

Awards and Certificates

- **Murf's 30 Days of AI Agents – Murf AI (August 2025)**
- **Career Essentials in Software Development** – Microsoft & LinkedIn
